

EyeOn **product** Sustainable Value Chain Game

Embark on a sustainable supply chain journey

Setting the stage for success

Our supply chain sustainability game is the perfect platform to kickstart your journey towards a greener and more responsible supply chain. It creates the right mindset and fosters team building within your project team. Participants will be immersed in the world of sustainable supply chains, where they will face real-world scenarios and make critical decisions.

Navigating the sustainable supply chain landscape

In this captivating game, participants will gain practical insights into how to navigate the complexities of supply chain sustainability. They will be challenged to make environmentally conscious choices, and optimize operations for a more sustainable future. By selecting sustainable practices and making informed decisions, participants will learn to balance environmental impact, social well-being, and economic viability.

Unlocking collaboration and teamwork

Our supply chain sustainability game emphasizes the power of collaboration and teamwork. Participants will work together, leveraging their unique skills and expertise, to overcome sustainability challenges and achieve shared sustainability goals. By enhancing communication and fostering strong relationships, your project team will emerge as a unified force, driving positive change and delivering sustainable outcomes.

Our game will equip your team with the skills, knowledge, and confidence needed to navigate the sustainability landscape, drive positive environmental and social impacts, and create a more sustainable future.

Game details

Objective

- Identify the effects that supply chain planning can have on waste, obsolescence, and CO2 emissions.
- Understand the best practices to balance your value chain and reduce waste and obsolescence.
- Improve your reporting and analytics to optimize inventory management concerning excess and obsolescence.
- Explore the opportunities improved forecast techniques can bring to prevent waste and reduce environmental impact.

Domain: Forecasting, Inventory Management, Sustainable Value Chains

Format: Presentational game. It can be adapted to play online

Group size: 3-24 persons

Duration: 2.5 hours (including introduction & reflection)

The Sustainable Value Chain game is suited for small and large groups. It can be played stand-alone but often it is integrated into inspiration sessions, trainings or workshops.

How to play?

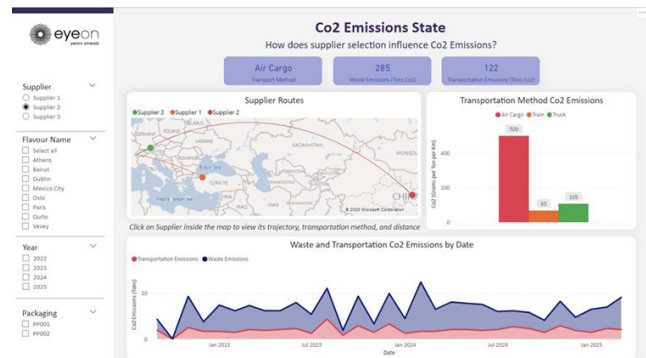

The game is played in two rounds, each focusing on an essential aspect of the supply chain. Participants are divided into small groups. The teams must solve supply chain issues in both rounds using our interactive value chain dashboard. A round is closed with a plenary discussion where you will learn from your peers and our experienced consultants.

Round 1: Balance your value chain:

- Identify key areas for sustainability improvement.
- Understand the environmental impact of CO2 contributors within global supply chains.
- Use reporting and analytics to evaluate the environmental footprint of your value chain.

Round 2: Prevent waste and obsolesces:

- Understand the root causes of excess inventory.
- Use reporting and analytics to tackle slow-moving and obsolete stock.
- Understand the opportunity of high-quality forecasting to limit waste in the value chain.

Getting the most out of the game

The game presents scenarios developed by our industry experts built on real-life cases and decision-making challenges. Experience the impact of each supply chain decision on the company's carbon footprint and adapt your choices in real-time to make the best trade-off between sustainability and feasibility.

Powerful learning experience

Turn supply chain challenges into wins for your company: gamify learning with our powerful simulations. EyeOn assures knowledge and skills get deeply embedded in your organization. Our business games are designed to let supply chain planning professionals acquire specific knowledge and skills they need to do their jobs. We guarantee a natural learning process by simulating recognizable day-to-day forecasting and planning challenges in large organizations.

Serious gaming

Our games provide a safe environment to learn by doing; Built on our vision of the learning journey, we integrate planning concepts with interactive assignments to teach specific skills, knowledge, and behaviors. EyeOn's business games are entertaining, engaging, and enriching.
